

Picasso's Influence on HTH—Analytical Cubism

Start with a drawing

add color

and an image &

throw in a pattern too.

Make a composition with these elements in Photoshop & save.

Alter the colors and/or values and save another version.

Print both and cut them up, then reassemble a new

composition.

Then trace that composition and scan back into Photoshop

where you color the tracing back in using the Eyedropper tool.

Then print this out and make a painting, like Jewelyn Buduan, senior at High Tech High (front image). To see more student art visit <http://staff.hightechhigh.org/~jrobin>
